PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/575,297	Applicant(s) SCHESSL ET AL.	
	Examiner /Stephen J. Castellano/	Art Unit 3781	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3781

Claims 18-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The mesh of the framework is the crossing of wires and doesn't refer to a single wire. A horizontal mesh would be the horizontal portion of the basket or framework rather than a vertical portion. The framework includes only one tier of horizontal meshes rather than a plurality. Further, the rack is attached to a vertical portion of the mesh not a horizontal mesh. However, the rack is attached to a horizontal wire within the vertical wall of the framework.

The "fixing means" doesn't properly invoke 112, sixth paragraph because the appropriate format for such expressions is : "means for (function)."

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith (5480035).

Smith discloses a crockery basket comprising a framework (dishwasher rack), at least one rack (shelf 20) and a plurality of holding elements (hubs 50, 51 on the plates or end caps 22). A first group of holding elements is provided on a first end cap 22 and a second group of holding elements is provided on a second end cap 22. The groups of holding elements on an end cap 22 are configured as a fixing ladder with one holding element located above another to make the height of the shelf adjustable. The fixing means made of plastic is the end cap 22. The rack has a

stop that engages a stop (ribs 56, 57) of the fixing means (end cap 22) (see col. 4, lines 3-7 and Fig. 2-3 and 5-7).
